DETAILED ACTION

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 1-6,8-25,27-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Leon(US 6,701,304).

Claim 1: Leon's patent discloses encoding an object by utilizing discernable physical attributes for encoding information regarding object in (fig.5 and col.2,lines 22-30). Leon discloses utilizing encoded information as at least one element for composing a digital watermark for object in (col.8,lines 14-23).

Claim 2: Leon discloses physical attributes further comprises a set of taggants in association with object, wherein set of taggants is comprised of members having discernable physical attributes predetermined for encoding information regarding object in (col.9,lines 45-52,61-67).

Claim 3: Leon discloses physical attributes comprises at least one of size and shape in (col.9,lines 42-44).

Claim 4: Leon discloses physical attributes comprise at least one of color and emission wavelength in (col.9,lines 18-20,61-65).

Claim 5: Leon discloses physical attributes comprise loading factor in (col.10,lines 1-8).

Claim 6: Leon discloses physical attributes comprise at least one of a radio frequency and a response to a radio frequency in(col.10,lines 2-8).

Claim 8: Leon discloses physical attributes are related to one or more dimensions of object in (col.8,lines 51-56).

Claim 9: Leon discloses detecting encoded information in digital watermark in (col.8,lines 14-23). Leon discloses authenticating object by comparing encoded information with discernable physical attributes of object in (col.13,lines 18-33).

Claim 10: Leon's patent discloses digitally watermarking a barcode in (col.8,lines 51-56;col.9,lines 49-52). Leon discloses associating digitally watermarked barcode with object in (col.12,lines 30-67;col.13,lines 13-33).

Claim 11: Leon discloses encoding additional information into digitally watermarked barcode in (col.8,lines 54-56).

Claim 12: Leon discloses additional information comprises at least one of date of manufacture, a country of origin, and an authorized distribution channel in (col.8,lines 62-65;col.11,table I).

Claim 13: Leon discloses additional information is retrieved from digitally watermarked barcode by use of a key in (col.2,lines 24-39;col.13,lines 34-40).

Claim 14: Leon discloses encoding a key in digitally watermarked barcode such that failure to read a digital watermark in digitally watermarked barcode in an inability to read barcode in (col.13,lines 33-42).

Claim 15: Leon discloses encoding an object by utilizing discernable physical object attributes for encoding information regarding object in (fig.5 and col.2,lines 22-30). Leon discloses utilizing encoded information as a key to retrieve data encoded in a digital watermark associated with object in (col.2,lines 24-39;col.13,lines 34-40).

Claim 16: Leon discloses authenticating object by utilizing data encoded in digital watermark in (col.13,lines 34-42).

Claim 17: Leon discloses a set of taggants in association with object, wherein set of taggants is comprised of members having discernable physical attributes predetermined for encoding information regarding object in (col.9,lines 45-52,61-67).

Claim 18: Leon discloses encoding an object by utilizing discernable physical object attributes for encoding information regarding object in (fig.5 and col.2,lines 22-30). Leon discloses utilizing encoded information as a key to retrieve data encoded in a digital watermark associated with object in (col.2,lines 24-39;col.13,lines 34-40).

Claim 19: Leon discloses encoding a key in digitally watermarked barcode such that failure to read a digital watermark in digitally watermarked barcode in an inability to read barcode in (col.13,lines 33-42).

Claim 20: Leon discloses physical attributes further comprises a set of taggants in association with object, wherein set of taggants is comprised of members having discernable physical attributes predetermined for encoding information regarding object in (col.9,lines 45-52,61-67).

Claim 21: Leon discloses utilizing encoded information as a key to read a digital watermark in digitally watermarked barcode in (col.2,lines 24-39;col.13,lines 34-40).

Claim 22: Leon discloses physical attributes comprises at least one of size and shape in (col.9,lines 42-44).

Claim 23: Leon discloses physical attributes comprise at least one of color and emission wavelength in (col.9,lines 18-20;61-65).

Claim 24: Leon discloses physical attributes comprise loading factor in (col.10,lines 1-8).

Claim 25: Leon discloses physical attributes comprise at least one of a radio frequency and a response to a radio frequency in(col.10,lines 2-8).

Claim 27: Leon discloses physical attributes are related to one or more dimensions of object in (col.8,lines 51-56).

Claim 28: Leon discloses a detector for detecting physical attributes and a watermark associated with object in (fig.5). Leon discloses a decoder for decoding information encoded by physical attributes and information included in watermark for at one of identifying or authenticating object in (col.13,lines 34-42).

Claim 29: Leon discloses physical attributes further comprises a set of taggants in association with object, wherein set of taggants is comprised of members having discernable physical attributes predetermined for encoding information regarding object in (col.9,lines 45-52,61-67).

Claim 30: Leon discloses a source for illuminating set of taggants, wherein detector detects at least one emission wavelength in response to the illumination in (col.9,lines 16-52).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 7,26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Leon(US 6,269,169).

Claims 7,26: Leon does not specifically disclose physical attributes comprises at least one of magnetic field and a response to a magnetic field. Official notice is taken that physical attributes comprises at least one of magnetic field and a response to a magnetic field is well known in the art. One of ordinary skill in the art would have been motivated to employ magnetic

field so that taggants can be detected while invisible to the eye thus enhancing security of the object.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
